

Tim Rhoads  773.808.3632  tim@solarblu.net solarblueth on:     /in/solarblueth

Web Developer and Project Manager with extensive background in WordPress, Web Hosting and Small Business Processes.

Company Requirements: A small company who needs help managing technology, located in the city of Chicago.

Compensation Sought: \$55,000 and health benefits.

Company:	Position:	Responsibilities:	Professional Experience
 2004 - Present	Wordpress Developer Technical Project Manager	Through the name Solarblu.net I provide freelance technical services. I help customers with wordpress issues, create new themes and templates, provide web hosting and help with personal computer issues. I also provide Wordpress and E-commerce consulting to small business clients.	
 2010-2011	Technical Project Manager E-commerce Business Analyst Wordpress Developer	For Traderoutlook.com I provided the direction for a new Wordpress E-commerce website. I merged two memberships systems into one new website. The website helped generate new sales, provide existing clients with new features and helped to promote the owner of the website through video segments.	
 2009-2011	Technical Project Manager Wordpress Developer Web Hosting Expert	At SeoDesignSolutions I helped create almost 300 Custom Wordpress Websites for small business clients. I helped develop best practices for SEO hosting and Wordpress Configuration. I also helped train interns to execute the processes as well as create Custom WordPress Themes.	
 2004-2009	Client Services Manager Collections Manager Billing Manager Technical Support	At Midphase.com I took part in growing an Ecommerce and Web Hosting company. I wrote PHP programs to expedite common business processes, as well as hired and trained staff to perform new jobs that were created as the company grew and was eventually sold to UK2.net	
 2001-2004	Application Developer Crystal Reports Writer Network Administrator	At Sackett Systems I helped a metal fabrication company determine the costs analysis of their product. Through data mining, Crystal Reports, Visual Basic, and some clever FoxPro programming I was also able to help the staff create manuals for their products.	

Educational Experience and Certifications

 1996	 1997-2001	 2000	Studied Information Technology, degree not completed. Worked on my MCP and currently working on my Cisco CCNA.
