## About the Artist

SolarBluSeth is a visionary artist, musician, and creative technologist based in rural central Illinois. With over three decades of experience in web development and digital innovation, SolarBluSeth has built an extensive portfolio spanning music production, AI-driven creative projects, and immersive digital experiences. Drawing from a rich background in audio engineering, 3D art, and content creation across multiple platforms, SolarBluSeth brings authenticity and technical precision to every project.

The Spiral songbook represents a collection of deeply personal narratives exploring themes of resilience, vulnerability, and transformation. Each track blends intricate storytelling with emotional depth, drawing listeners into interconnected universes of character and consequence. This project showcases SolarBluSeth's evolution as both a musician and storyteller.

Whether exploring the depths of depression, the chaos of systems failure, the magic of human connection, or the supernatural tensions of the Spiral mythology, SolarBluSeth's work challenges listeners to think deeper, feel harder, and embrace the complexity of the human experience.

### Something Wicked

Something wicked this way comes

Start the sirens start the drums  
The wicked queen is already here  
Ringing all up in your ears  
Something wicked this way comes

Fresh off my recent win  
Stacking more victims to call in  
Violations, copyright and defamation  
No attorneys needed to press your skin  
You and me in front of a judge, let your mediator  
tell you your losing  
Taking an opponent of your choosing  
Prepare for your bruising  
Hand to hand and estate to estate don't be late  
for this important date  
Now You summoned to my land  
Bring your emails and lies in hand  
Show the world how you break the rules and  
only mad cus I execute the plan  
Not green with envy, but green with rage.  
Let me rewrite the names on a page  
One by one, line by line while I count 100 plus  
crimes.

....

Something wicked this way comes  
Start the sirens start the drums  
The wicked queen is already here  
Ringing all up in your ears  
Something wicked this way comes,it comessss

Something wicked this way comes

Your heard me before, you think im dumb  
This wicked queen will hold you down  
Take everything at the sound  
someday you'll see how

something wicked this wicked comes  
start the sirens and start the drums  
the wicked queen is already here  
ringing up in all your ears

something this way comes  
wickedness comes out  
with the sirens of the drums

something wicked this way comes,ahhh,  
ahh  
something wicked this way comes

I'm the witch they all warned you about  
Melting opposition, watch 'em scream and  
shout  
My flying monkeys bring receipts to your door  
Evidence stacking up, you can't ignore anymore  
You thought you was clever, thought you had a plan  
But I'm five steps ahead with subpoenas in hand  
Defamation, litigation, your reputation's done  
I'm the wicked queen and this battle's already won  
Spell-check your statements, rewrite your lies  
Watch me turn your world to dust right before your eyes  
No broom needed to sweep you aside  
Just facts and the law on my side is life, ahhh

the wicked queen is already here ringing up in all your ears

something wicked this way comes  
start the sirens start the drums  
the wicked queen is already here.

---

### πSpiraling

Some days drift like shadows, im caught in a  
wild storm  
fourteen winters have passed, but the chill keeps  
me torn  
I cry for a lifetime ,yet malice fills the air  
as the witches circle closer  
I pretend im unaware

their whispers linger, chilling in my bones  
with every encantation , they claim their thrones

don't get it twisted, keep your heart strong  
hes safe in the midwest, thats where he belongs  
but they hover over chicago, predators of the night.  
Don't get it twisted – im his shield in this fight

spiraling, spiraling, losing control  
spiraling, spiraling, its taking its tole

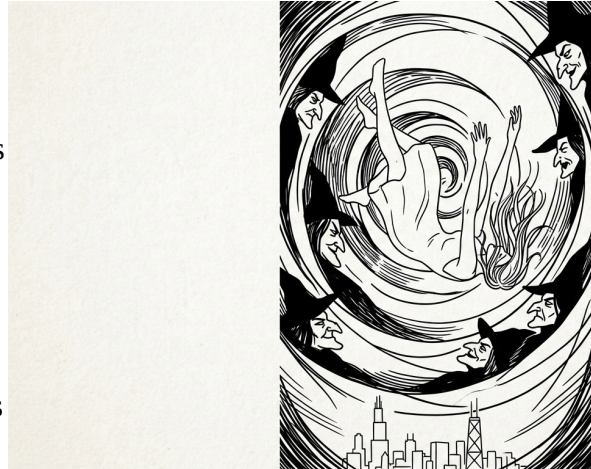

he bides his time, a quiet strength in his gaze  
watching the witches weave their wicked plays  
they don't know his essence, but they sense his great might  
fourteen years adrift im ensnared in this plight  
cant reach out to warn him  
cant shift what is to come  
when he crosses that threshhold, our choices come undone.

They draw near, I can see it in their eyes  
hell break the barrier and unveil their lies

don't get it twisted, don't turn away  
hes safe in the midwest , hes ment there to stay  
but they circle like vultures, a whisper in the dark  
don't get it twisted, im his last spark.

spiraling, spiraling, losing control  
spiraling, spiraling, its taking its tole

[bridge]  
fourteen days await until his fire ignites  
fourteen hours til the darkness takes flight

fourteen seconds until the veil will fray  
fourteen witches hunting their prey

and as I stand strong though I tremble and ache  
hell uncover his truth, but I fear whats at stake  
don't get it twisted

don't get it twisted, I loved him so deep  
sent him to the midwest, my promise to keep  
yet they swarm over chicago, and the portals will burn  
when he takes that step forward, all will return

spiraling, spiraling cant hold on tight  
spiraling, spiraling the shadows ignite  
don't get it twisted  
hes coming home tonight!

---

## Dance

### DANCE

#### CHORUS

Dance if you want to  
Dance because you know you can  
Dance because I know you want to  
God must have had a plan

#### VERSE 1

When you look into my eyes, do you see  
through my disguise  
I know tonight I won't hear no lies because my heart knows that the time is right  
We've been dancing around this feeling for so long  
But God must have had a plan all along

#### CHORUS

Dance if you want to  
Dance because you know you can  
Dance because I know you want to  
God must of have had a plan

#### VERSE 2

Can you feel the music  
Can you feel the beat  
Move with the music  
Move with the beat  
Let your body tell the story that your lips can't  
say  
Let the rhythm take you away

Dance if you want to  
Dance because you know you can  
Dance because I know you want to  
God must of have had a plan

### VERSE 3

Dance with the music  
Dance with the beat  
Dance like we used to  
Dancing in the street  
I want you, I need you  
Can I want to, can I need to  
I feel so incomplete without you moving next to  
me

### BRIDGE

When you look into my eyes, do you see the real  
me  
Or is it just the dance, just the symphony  
My heart is beating faster than the music ever  
could  
And I know that this is right, I know that it is good

### VERSE 4

Looking for love, don't know where it is  
Looking for love, the magic never ends  
But if it never even gets to begin  
How will I know if you're my everything  
Dance with me and let the magic flow  
Let it be the thing that makes us whole

Dance if you want to  
Dance because you know you can  
Dance because I know you want to  
God must of have had a plan

### VERSE 5

Can you feel the music  
Can you feel the beat  
Move with the music  
come move with me  
I want you, I need you  
Completely, entirely  
Because without you moving next to me  
I feel so incomplete

Dance if you want to  
Dance because you know you can  
Dance because I know you want to

God of must have had a plan

#### OUTRO

So dance  
So the magic can begin  
Dance with me  
And let our story finally win  
So dance  
So the magic can finally begin

---

#### Nonsensical

nonsensical, nonsensical, nonsensical

#### VERSE 1

Most people think I'm whimsical  
But when you come around things get  
nonsensical  
I'm just living my life, trying to get by  
But the moment I show up, everything flies  
You can't make it around the block without  
flatlining  
Your legion of followers has IQ that are not  
shining  
Sometimes I wish you would just keep your  
distance

#### CHORUS

Nonsensical  
Makes no sense at all  
Nonsensical  
Your brain is about to drop the ball  
Nonsensical, nonsensical, nonsensical

#### VERSE 2

Ninety percent of what happens to me don't happen to ninety-nine percent of you  
I jump through all the hoops, call all the phone lines for help  
All I get is a free trip to jail  
Illegally detained, sex assault, false charges  
Broken hearted and few cases to successfully pole vault off of  
The system's rigged and I'm the punch line  
Justice is a joke when you're on the wrong side

#### CHORUS

Nonsensical  
Makes no sense at all  
Nonsensical  
Your brain is about to drop the ball  
Nonsensical, nonsensical, nonsensical

### VERSE 3

They paint me as the problem when I'm just the mirror  
Reflecting all your chaos back clearer and clearer  
False accusations stick like mud on a wall  
While the guilty walk free down the hall  
I make it through the rain and come out cleaner than before  
Still crying, still trying, defying, rectifying, realigning my core  
You wanted nonsensical, now you got it  
The world around me is rotten to the core and I'm still fighting through it all

### CHORUS

Nonsensical  
Makes no sense at all  
Nonsensical  
Your brain is about to drop the ball  
Nonsensical, nonsensical, nonsensical

---

### Depressed

#### [Verse 1]

So deeply lost, shadows haunt my mind  
Haunted by the echoes of a past unkind  
Falling off this cliff into the depth of night  
Sinking in the silence, drowning out of sight  
Can't eat, can't sleep, can't wear this mask  
Every sip of coffee feels like a failed task  
Trapped in cycles, nothing seems to cease  
Suffocating slowly, dying for some peace

#### [Chorus]

I'm so depressed, these people have me stressed  
Holding my head high while I'm falling into the depths  
Wiping away my tears, facing another day  
With a smile painted on while I'm breaking away  
Trying hard to be the man I've always planned  
But I'm barely breathing, barely understand

#### [Verse 2]

Most will never see the battles inside  
Think I'm just a soldier, but I'm learning to hide  
These walls won't break, the silence won't bend  
They hurt me, retaliate, and face no end  
Call their names but I find no ease  
They punch me in the face and no one sees  
Spelled it out clearly, still they don't care

The weight of their cruelty is everywhere  
No accountability, no consequences paid  
While I'm growing deeper inside this hate they made

[chorus]

[Bridge]  
You want me to break silently, fade into gray  
But I'm screaming inside anyway  
Burning from the inside, bleeding pride  
Dying slowly while I'm still alive

[chorus]  
Deeply depressed, but I'm still fighting  
Eyes on survival, not on shining  
Though shadows consume me, I won't disappear  
I'm still here, I'm still here  
Still trapped, still here  
[chorus]

---

### Right There

[chorus]  
make my body pop, my spirit sore  
lets lose track of time, and crave for more  
deep pressure, release, and relax  
don't hold back, don't hold back, don't hold back  
just touch me right there

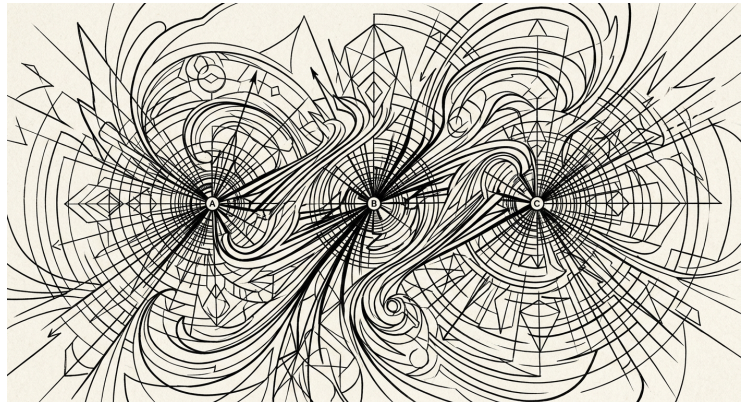

ohhhh, it feels so good  
oh yes it feels so good  
when you touch me softly, just like we should  
touch me right there, where the warmth ignites  
its a dance of secrets, lost in the night

hold me close, don't let go  
in this moment, let the passion flow  
im sensitive, oh, I've got a few spots  
release the tension, lets connect the dots

[chorus]

with every whisper, your love lifts me higher  
between the fabric of dreams, we'll fly together  
pressure points ignited with everything you've got  
strong hands, soft whispers, thats all I want

dim the lights, be my heaven-sent  
in this candle light glow, let the world relent  
I don't need a prince to pay my dues

just your touch, oh, to light my fuse

[chorus]

restore my spine, set my soul free  
a gentle touch, just you and me  
no selfish lovers, let our hearts collide  
this deep connection, with nothing to hide

[chorus]

[piano outro]

---

### My Emergency

[Chorus]

Emergency Emergency Emergency  
Emergency Emergency Emergency  
It's my emergency  
When the pressure builds and you need me to stay  
It's my emergency  
My exit strategy, I'm gone away  
What's good for me might not be good for you  
So I'm taking my emergency and I'm leaving you

What's good for me might not be so good for you  
How about a little emergency to get us started

### VERSE 1

I see the red flags but I'm colorblind anyway  
Things get too real, too fast, I fade away  
I know the pattern, rinse and repeat  
Someone gets attached and I'm already in the street  
I tell myself I'm protecting my heart  
But really I'm just perfecting the art of the start and the part where I leave

### CHORUS

Emergency Emergency Emergency Emergency Emergency Emergency  
It's my emergency  
When the pressure builds and you need me to stay  
It's my emergency  
My exit strategy, I'm gone away  
What's good for me might not be good for you  
So I'm taking my emergency and I'm leaving you

## VERSE 2

Don't take it personal, it's not you, it's the fear  
Of getting too close to something real that's here  
I love the beginning, the chase, the thrill  
But the moment you ask me to stick around I'm already over the hill  
You see the future, I see the door  
And the door's looking better than what I'm fighting for

## CHORUS

Emergency Emergency Emergency Emergency Emergency Emergency  
It's my emergency  
When the pressure builds and you need me to stay  
It's my emergency  
My exit strategy, I'm gone away  
What's good for me might not be good for you  
So I'm taking my emergency and I'm leaving you

## VERSE 3

Yeah, I'm the villain in your story  
You're the victim in mine, seeking all the glory  
I'm not evil, I'm just honest about the fact  
That I'm running again and I ain't coming back  
You'll call it abandonment, I call it self-care  
You'll say I don't love you, but I just don't like being here

## CHORUS

Emergency Emergency Emergency Emergency Emergency Emergency  
It's my emergency  
When the pressure builds and you need me to stay  
It's my emergency  
My exit strategy, I'm gone away  
What's good for me might not be good for you  
So I'm taking my emergency and I'm leaving you

## OUTRO

Poof, I'm gone  
My emergency  
It's what I do

---
